Allianz Global Investors Fund - Allianz Green Bond Share Class P2 (H2-GBP)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU1566179385
WKN: A2DLV7

Objectives and Investment Policy

Long-term capital growth by investing in investment grade rated Debt Securities of the global Bond Markets denominated in currencies of OECD countries in accordance with the Green Bond Strategy.

We manage this Sub-Fund in reference to a Benchmark. Sub-Fund's Benchmark plays a role for the Sub-Fund's performance objectives and measures. We follow an active management approach with the aim to outperform the Benchmark. Although our deviation from the investment universe, weightings and risk characteristics of the Benchmark is likely to be material in our own discretion, the majority of the Sub-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

The Sub-Fund follows a sustainable investment objective by mobilizing capital markets towards the transition to a low carbon society, natural capital preservation and adaptation to climate change, and analyses that investments made do not significantly harm the environmental investment objectives. Min. 85% of Sub-Fund assets are invested by us in Green Bonds in accordance with the Green Bond Strategy. Green Bonds are bonds which are intended to encourage sustainability and to support climate-related or other types of special environmental projects. Min. 80% of Sub-Fund assets are invested by us in bonds with a good credit rating. Sub-Fund assets may be completely invested by us in Emerging Markets. Max. 15% of Sub-Fund

assets may be invested by us in bonds other than described in the investment objective. Max. 10 % of Sub-Fund assets may be invested by us in ABS and/or MBS with a good credit rating. Max. 25% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 10% non-EUR Currency Exposure. Duration of Sub-Fund assets should be between zero and plus 10 years.

Exposure to the base currency of the fund (EUR) will be hedged to a large extent against the reference currency of the shareclass (GBP) which reduces the potential risks and limits potential gains from exchange rate movements.

Benchmark: ICE BOFAML Green Bond (hedged into GBP).

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommendation: the Share Class of the Fund should be held for at least a medium-term investment horizon.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 3 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 3 might be subject to low to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	2.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.47%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 30.09.2020. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

You will find more details about the calculation of the charges by checking the respective part of the prospectus.

Past Performance

■ Percentage growth of the fund
■ Benchmark: starting 29.11.2019 ICE BOFAML Green Bond (hedged into GBP)

Past performance is not a reliable guide to future performance.

The actual grade of deviation from the Benchmark defines the extent to which the fund's performance may outperform or underperform the Benchmark's performance.

The past performance shown here takes account of all charges and costs with the exception of the entry, switching and exit charge.

The fund was launched in 2015. This share class was launched in 27.02.2017.

The performance of the fund is calculated in GBP.

BMO Responsible Global Equity Fund

Share Class: 2 Acc, a Fund of BMO Investment Funds (UK) ICVC V (ISIN GB0033145045)
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to provide long-term capital growth.

The Manager seeks to achieve this by investing mainly in global equities (ordinary shares in companies from anywhere in the world). The Manager invests only in assets which meet the Fund's ethical screening criteria. The ethical screening applied to the Fund means that a number of the largest companies are screened out on ethical grounds.

While the Manager will invest mainly in equities, it may also invest in other investments such as derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to hedge positions or to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities or currencies other than the Fund's accounting currency, which is sterling. The Fund does not normally hedge currency exposure.

Investment is concentrated in companies in any market whose products and operations are considered to be making a positive contribution to society and seeks to avoid companies which, on balance, do particular harm (including those involved in the sale of armaments) or operate irresponsibly (for example with regard to the environment or human rights).

The Fund is actively managed. The Manager believes that an appropriate comparator benchmark for reviewing fund performance is the MSCI World index, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition.

Any income earned by this share class will be reinvested back into the share class to help boost the value of the share.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk

Typically higher rewards, higher risk

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Loses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Ethical Screening Risk: the screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened fund.

Currency Risk: your investment may be adversely affected by changes in currency exchange rates.

Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.79%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

The ongoing charges figure is at 30/11/2020

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section entitled Fees and Expenses in the Fund's prospectus, which is available at www.bmogam.com.

KEY INVESTOR INFORMATION

EDENTREE RESPONSIBLE AND SUSTAINABLE

SHORT DATED BOND FUND

SHARE CLASS B GB00BZ012J01

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. This fund is a sub-fund of EdenTree Investment Funds, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate director.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to preserve capital and generate a regular income payable quarterly.

The EdenTree Responsible and Sustainable Short Dated Bond Fund seeks to invest at least 80% in short dated government bonds and debt instruments issued by companies that the manager believes make a positive contribution to society and the environment through sustainable and socially responsible practices.

In line with the Fund's objective to preserve capital, the Fund will aim to invest at least 80% in sterling denominated fixed interest securities of short duration. Portfolio duration will be expected to average around 2 years, with the anticipated upper limit being 3 years. The portfolio will also look to maintain high credit quality. Securities will usually have a minimum credit rating of A by Moody's, S&P and or Fitch to be considered for investment. A maximum of 10% of the holdings may be invested in BBB-rated debt, seeking a target overall portfolio rating of A or better.

The Manager may also invest in units in collective investment schemes, money-market instruments, derivatives and forward transactions, term deposits, nil and partly-paid securities, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, weapon production, gambling, publication of violent or explicit materials, oppressive regimes, companies using animals to test cosmetic or household products, intensive farming and fossil fuel exploration and production.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

Further details of EdenTree's Responsible and Sustainable Investment Policy which are available on request or can be downloaded from our website at www.edentreeim.com.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

This Fund is marketable to retail investors and will be managed in line with the requirements for inclusion in an Individual Savings Account (ISA) but is not available for direct investment in our stocks and shares ISA.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

RISK AND REWARD PROFILE

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using simulated historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 2 as its price has experienced nominal rises and falls historically based on simulated data.

What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.
- The issuer of a financial security held within the Fund may not pay income or repay capital to the Fund when due. The value of a security may be affected by the general state of the economy and market perception of the risk of default.

More details on all of the risks mentioned above can be found in the full Prospectus.

Federated Hermes Impact Opportunities Equity Fund (the “Fund”) a sub-fund of Federated Hermes Investment Funds plc (the “Company”)

Class F Stg£ Acc. Shares (ISIN: IE00BD3FNV41)

Hermes Fund Managers Ireland Limited (the “Manager”)

Objectives and investment policy

The Fund aims to increase the value of your investment over a rolling period of any five years.

However, there is no guarantee that this will be achieved and your capital is at risk.

The Fund will invest in companies that provide innovative solutions to meeting the world’s environmental and social challenges.

The Fund is an actively managed, diversified portfolio that will invest at least 67% in shares of companies of any size globally.

The Investment Manager will consider how well companies manage environmental, social and governance (“ESG”) factors. The companies will either have strong or improving ESG characteristics. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%.

The Fund may borrow on a limited basis (up to a maximum of 10% of the value of the Fund). Leverage is not part of the investment strategy of the Fund.

The Fund’s base currency is USD but its investments may be priced in other currencies. Derivatives may be used to convert the value of those investments into USD.

The benchmark, for performance comparison purposes only, is the MSCI All Country World Index Investable Market Index.

You may buy or sell shares in the Fund each business day (except bank holidays in the UK and Ireland).

This Share Class is accumulating. Your portion of any income received will be reinvested. This will be reflected in the value of your shares.

Useful definitions

- **Bonds:** A Fixed Income debt investment (also known as ‘Credit’) in which the Fund lends money to a government or company, who is then obliged to pay a specified amount back to the purchaser of the Bond on a given future date. The amount to be repaid usually includes the original amount (the principal) plus interest (coupons).
- **Derivatives:** Investments whose value is linked to one or more underlying assets.
- **Leverage:** Use of various instruments or borrowed money that increases the exposure of the Fund to its investments – this has the potential to increase both the gain and loss of an investment.
- **ESG:** An acronym for ‘Environmental, Social and Governance’ characteristics. A company can be assessed on its management of these considerations.

Risk and reward profile

Narrative explanation of the indicator and its main limitations:

The value of investments and income from them may go down as well as up and you may not get back the original amount invested.

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean ‘risk free’.
- This reflects volatility of the Fund based on historic movements of underlying investments.

Particular risks not adequately captured by this indicator include:

- **Equity Risk:** The value of equities (such as shares in a company) can be affected by market movements. Other influential factors include political and economic news, company earnings and significant corporate events.
- **Currency Risk:** Fluctuations between the share class currency and the base currency of the Fund may negatively affect the value of your investment.

- **Emerging Markets Risk:** The performance of the Fund may have some dependence on the economic environment of emerging markets, which has increased risk compared to developed markets.
- **Counterparty Risk:** The Fund will be exposed to any institutions providing custody of assets, deposits or acting as counterparty on financial Derivatives. In the event of a counterparty experiencing financial difficulties, the Fund may be exposed to financial loss.
- **Leverage Risk:** The use of leverage may result in large fluctuations in the net asset value of the Fund, amplifying either gains or losses.
- **Liquidity Risk:** In difficult market conditions, certain Fund investments may be harder to sell at the last quoted market price.
- **Sustainability Risk:** The prices of securities in which the Fund may invest may be affected by ESG factors, further affecting the Fund’s value and performance.
- **Operational Risk:** The potential loss resulting from error or failure arising from people, systems, controls/safeguards or service providers that the Fund relies on.

FP Foresight Global Real Infrastructure Fund, a sub-fund of FP Foresight OEIC
Class A Accumulation Shares (GBP) (ISIN GB00BK0T9T82)
Class A Income Shares (GBP) (ISIN GB00BK0TB032)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The Fund aims to grow, over any 5 year period, by more than 3% per annum above the rate of UK inflation (as measured by the UK Consumer Prices Index). There is no guarantee that the Fund will achieve a positive return over this, or any other, period and you may not get back the original amount you invested.

Policy:

- The Fund will invest directly in the shares of companies (including listed Investment Trusts, Real Estate Investment Trusts (REITs), ETFs and other investment company structures depending on the relevant jurisdictions) or units of Master Limited Partnerships that, in each case, are publicly traded (listed) on stock exchanges in developed markets (meaning North America, Western Europe and Asia Pacific); and that own or operate real infrastructure or renewable energy assets anywhere in the world. Such companies' revenue streams are typically directly or indirectly supported by long term government or public sector contracts and government supported initiatives.
- No more than 50% of the Fund by value will be invested in shares that have a primary listing in a single country. The Fund may also invest in cash for liquidity and cash flow purposes and to pay fund expenses and redemptions.
- The Fund may invest in certain financial contracts (derivatives (contracts where the value is linked to the expected future price movements of an underlying asset) or forward transactions) for efficient portfolio management (including hedging) (to reduce costs and/or the overall risk of the Fund).
- The Fund will only invest in the shares of a company if the investment manager in its discretion considers that the company delivers a net social or environmental benefit.

Benchmark:

The UK Consumer Prices Index is a target benchmark against which the performance of the Fund has been set ('Target Benchmark'). The Target Benchmark was chosen by the ACD because the Fund will invest in investments that are inflation-linked (infrastructure and renewable energy assets are typically inflation-linked as a result of benefiting from government or public sector subsidies, concessions or service provision contracts which are themselves normally inflation-linked).

Other information:

- You can buy and sell shares between 9am and 5pm on most business days when the London Stock Exchange is open for a full range of services.
- The Fund's base currency is Pounds Sterling.
- We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.
- If you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.
- If you hold income shares, income from your investment is paid out to you four times a year.
- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- Charges applicable to the Fund accrue daily, therefore an equivalent rise in the value of shares is required before the original investment can be recovered.

• This indicator above is not a measure of the risk of capital loss, but an estimated measure of the Fund's price movement over time. It is based on historical data, and thus may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The Fund appears as a '5' on the scale. This is because it invests in the infrastructure industry and the Fund's simulated and/or realised return has experienced high rises and falls historically.

• The risk indicator is not related to the risk scale number of the Fund.

The indicator does not take into account the following risks of investing in the Fund:

- The Fund relies on other parties to fulfil certain services, investments or transactions. If these parties become insolvent and fail to meet their obligations, it may expose the Fund to financial loss.
- Infrastructure companies may be subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programmes, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown, surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors.
- Changes in exchange rates may mean the value of your investment goes up and down.
- Certain securities could become hard to value, sell at a desired time and place, or cease to trade altogether.
- The Fund's portfolio will be focused on equities within the Global Infrastructure Sector. Whilst increasing the potential reward, the nature of a more focused portfolio can increase risk. As such, the returns may be more volatile and will be impacted more by fluctuations in the value of underlying stocks within the Global Infrastructure Sector.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available at www.FundRock.com. Impax Asian Environmental Markets (Ireland) Fund - Sterling “X” Accumulation Shares

ISIN: IE00BYQ91839

A sub-fund of Impax Funds (Ireland) plc.

OBJECTIVES AND INVESTMENT POLICY

Impax Asian Environmental Markets (Ireland) Fund (the Fund) aims to generate long term capital growth.

The Fund invests mainly in the shares of publicly quoted companies that conduct their business in Asia Pacific Region, which provide, utilise, implement or advise upon technology-based systems, products or services in environmental markets. We define environmental markets as:

- Renewable & Alternative Energy;
- Energy Efficiency;
- Water Infrastructure & Technologies;
- Pollution Control;
- Waste Management & Technologies;
- Environmental Support Services; and
- Sustainable Food & Agriculture.

The Fund invests mainly in China, Hong Kong, Taiwan, Japan, South Korea, India, Australia, New Zealand, Singapore, Malaysia, the Philippines, and Thailand. Most of these countries are classified as emerging markets, regions of the world that are typically still developing their economies.

The Investment Manager adds rigorous environment, social and corporate governance analysis for risk management and specific activity screens and limits for additional clarity and reassurance.

Any income the Fund generates for this share class will be reinvested to grow the value of your investment.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon.

The Fund is actively managed and is not managed in reference to a benchmark.

You can buy and sell shares on any day excluding Saturday and Sunday on which banks are normally open for business in Dublin, Luxembourg and London. Exceptions are more fully described in the Prospectus.

For full investment objectives and policy details, please refer to the Prospectus under 'The Company: Investment Objectives - Policies and Restrictions'.

In addition to describing the Sterling “X” Accumulation Shares (IE00BYQ91839), this Key Investor Information Document may also be used as a representative for the Fund’s US Dollar “X” Accumulation Shares (IE00BJKWYZ15) and Euro “X” Accumulation Shares (IE00BJKWYX90).

RISK AND REWARD PROFILE

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

In addition to the above, the risk and reward indicator:

- is based on historical data and may not be a reliable indication for the future;
- The Fund is in category 6 because of the high range and frequency of price movements of the underlying investments the Fund invests in; and
- is not guaranteed and may change over time.

The lowest category does not mean that a share class is risk free. Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by the following:

- The Fund’s investments are subject to market fluctuations, so they can fall as well as rise in value.
- The Fund’s underlying currency is Sterling. Therefore should you invest in US Dollar or Euro Share Classes there is a risk that, regardless of the Fund’s performance, your investment may be adversely affected by changes in currency movements.

- The Fund’s investments may be in currencies other than Sterling. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund’s investments.
- The Fund’s investments may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions in foreign investment and the movement of money from one country to another, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.
- The Fund may invest in financial derivative instruments. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries, putting your money at greater risk.
- Substantial selling by shareholders may necessitate the fund manager having to sell investments, incurring losses that would otherwise not have arisen.
- The Fund may invest in Participatory Notes (an instrument that is similar to owning shares) which may expose investors to losses where the issuer of the Participatory Note becomes insolvent or defaults on their obligations.

An extended discussion of the risks associated with an investment in the Fund is set out in the Prospectus under 'The Company - General Risk Factors'.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year:	
Ongoing charges	0.95%
Charges taken from the Fund under specific conditions:	
Performance fee	NONE

The ongoing charges figure shown here is an estimate of the charges. An estimate based on end of year AUM is being used rather than an ex-post figure because the Company believes the ex-post figure to be unreliable in light of the increase in the Fund's assets towards the second half of 2020. The Fund's annual report for each financial year will include detail on the exact charges made.

This figure may vary from year to year and does not include Fund transaction costs.

When you buy or sell shares, an additional charge (anti-dilution levy – maximum 1%) may be payable to cover the costs incurred by the Fund in buying or selling investments for the Fund. This anti-dilution levy will only be payable during periods of continuous net subscriptions or net redemptions.

For more information about charges, please refer to the Company's Prospectus under 'Fees and Expenses'.

Impax Environmental Leaders (Ireland) Fund - Sterling “X” Accumulation Shares

ISIN: IE00BYQNSF13

A sub-fund of Impax Funds (Ireland) plc.

OBJECTIVES AND INVESTMENT POLICY

The Impax Environmental Leaders (Ireland) Fund seeks to achieve sustainable, above market returns over the longer term by investing globally in companies active in the growing Resource Efficiency and Environmental markets.

These markets address a number of long term macro-economic themes: growing populations, rising living standards, increasing urbanisation, rising consumption and depletion of limited natural resources. Investments are made in companies which have >20% of their underlying revenue generated by sales of environmental products or services in the energy efficiency, renewable energy, water, waste and sustainable food and agriculture markets.

The investment decision process is based on multi-year trends including impacts arising from population changes, infrastructure issues, scarcity of resources and environmental issues. The Fund aims to invest in companies that display positive environmental, social and governance attributes.

The Fund invests mainly in the shares of publicly quoted companies in developed markets.

Any income the Fund generates for this share class will be reinvested to grow the value of your investment.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon.

The Fund is actively managed and is not managed in reference to a benchmark.

GLOBAL SUSTAINABLE EQUITY FUND

Class I Acc ISIN: GB00B71DPP64

Fund Currency: GBP Share Class Currency: GBP

Janus Henderson
— INVESTORS —

A sub-fund of Janus Henderson Sustainable/Responsible Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term (5 years or more).

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of companies, of any size, in any industry, in any country. The Fund will invest in companies whose products and services are considered by the investment manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy. The Fund will avoid investing in companies that the investment manager considers to potentially have a negative impact on the development of a sustainable global economy.

The Fund may also invest in other assets including cash.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the MSCI World Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Global sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The investment manager looks to construct a differentiated and well diversified global portfolio of companies, based on the belief that superior

returns can be generated by companies that are providing solutions to environmental and social challenges. These companies should have attractive financial attributes such as persistent revenue growth and durable cash flows, as well as exhibiting strong management of environmental, social and corporate governance risks. Companies will typically be strategically aligned with themes such as climate change, resource constraints, growing populations, and ageing populations. The Fund avoids investing in fossil fuels and companies that stand to be disrupted by the transition to a low-carbon economy.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Sustainable Investment The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/ unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Past performance

Charges taken from the Fund over a year

Ongoing Charges	0.84%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 31 March 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in July 1991 and the share class was launched in July 2012.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

*Class I Acc was launched in July 2012. Performance prior to that date is simulated past performance based on the Class I Inc of the same fund which reflects the same ongoing charge, which is currently 0.84%.

The Fund is actively managed with reference to the FTSE All Share Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA UK Equity Income sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The investment manager adopts a flexible and pragmatic investment process, designed with the intention of achieving its objective in a variety

of market conditions. The investment process focuses on UK companies with good cash flow and growing dividends, as well as seeking only to invest in companies with a high level of environmental, social and governance (ESG) integrity, which avoids investing in companies involved in such areas as gambling, alcohol production, the military, nuclear energy, and tobacco.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦			
♦ Lower risk			Higher risk ♦			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be

difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Sustainable Investment The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge 0.00%

Exit Charge 0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges 0.84%

The ongoing charges are based on actual annualised expenses for the period ending 31 March 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

Jupiter Responsible Income Fund I-Class

I-Class Accumulation Units, ISIN: GB00B40TGH32
The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective
The Fund objective is to provide income together with capital growth in order to achieve a return, net of fees, higher than that provided by the FTSE4Good UK Index over the long term (at least five years).

Policy
At least 70% of the Fund is invested in shares of companies based in the UK that are actively managing their environmental and social impacts or are providing solutions to environmental and social problems. Up to 30% of the Fund may be invested in other assets, including shares of other companies (based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

Strategy
The fund manager focuses on companies that they consider to be responding positively to or profiting from the challenges of sustainability. The Fund will not invest in companies generating more than 10% of revenues from any combination of armaments, tobacco and nuclear power.

Benchmarks
Target benchmark - FTSE 4Good UK Index

The FTSE 4Good UK Index is an industry standard index and is one of the leading representations of companies in the UK stock markets that meet globally recognised corporate responsibility standards. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark – IA UK All Companies Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA UK All Companies Sector.

Active Management
The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation
This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- All the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.93%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure excludes the costs of buying or selling assets for the Fund (unless those assets are shares of another fund). A change to the Fund's charging structure took effect on 29/05/2020. The ongoing charges figure with effect from that date is fixed. The annual report and accounts for the Fund will include details of the exact charges made.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust UK Ethical Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Acc class (ISIN: GB00B8HCSD36). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long-term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 80% in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK). All investments will be expected to conform to our social and environmental criteria.
- The Fund will typically invest 95% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
 - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
 - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

Risk and reward profile

- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology adopted by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily because of its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.

M&G Positive Impact Fund

a sub-fund of M&G Investment Funds (10)

Sterling Class I – Accumulation shares ISIN no. GB00BG886B02

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to:

- provide a combination of capital growth and income, net of the ongoing charge figure, that is higher than the MSCI ACWI Index over any five-year period; and
- invest in companies that have a positive impact on society through addressing the world's major social and/or environmental challenges.

Core investment: At least 80% of the fund is invested in the shares of companies across any sector and of any size from anywhere in the world, including emerging markets. The fund is concentrated and usually holds shares in fewer than 40 companies.

Companies are assessed on their investment credentials and ability to deliver positive social and/or environmental impact, based on M&G's impact assessment methodology. Companies that are deemed to be in breach of the United Nations Global Compact principles and/or involved in industries such as tobacco, controversial weapons or nuclear power are excluded from the investment universe.

Other investments: The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives: The fund may use derivatives to reduce the risks and costs of managing the fund.

Strategy in brief: The fund invests over the long term in companies that make a positive social and/or environmental impact alongside a financial return. Sustainability and impact considerations are fundamental in the stock selection process. The fund embraces the United Nations Sustainable Development Goals framework and invests in a range of companies focused on areas including climate action, pollution reduction, education and working conditions.

Benchmark: MSCI ACWI Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged Share Classes, the benchmark is shown in the Share Class currency.

The following information can be found on the M&G website:

- an explanation of some terms used in this document: <https://docs.mandg.com/docs/glossary-master-en.pdf>
- the Prospectus including the fund's objective and investment policy.
- the fund's ESG criteria and the approach to exclusions.
- an annual report to assess the fund's non-financial objective, when available.

Other information

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 5 because its simulated Net Asset Value has shown medium to high rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.70%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 15 February 2021.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.70%. The fund's annual report for each financial year will include details on the exact charges made.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Global Environment Fund

A sub-fund of Ninety One Fund Series iii managed by
Ninety One Fund Managers UK Limited

Class I Accumulation shares in sterling
ISIN: GB00BKT89K74

Objectives and investment policy

The Fund aims to grow the value of your investment and provide income over at least 5 year periods, after allowing for fees.

The Fund invests primarily (at least two-thirds and typically substantially more) in the shares of companies which the Investment Manager believes contribute to positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). This means the Investment Manager focuses on identifying companies whose products, technologies and/or services avoid carbon, relative to their industry peers. Examples may include companies which provide, utilize, implement or advise upon technology-based systems, products or services in environmental markets, particularly those of alternative energy, decarbonisation and energy efficiency, water treatment and pollution control, and waste technology and resource management. These companies are typically committed to renewable energy, resource efficiency and/or electrification (the process of powering by electricity by switching from other power sources).

This approach means that not all companies in the portfolio will have low absolute levels of carbon emissions as the company's shares may be selected because the Investment Manager believes the company contributes to sustainable decarbonisation in another way. The Fund does not place a time limit on an investment in the shares of a company and may remain invested in the shares of companies that do not reduce their absolute carbon emissions, provided that the company continues to meet the criteria set out above.

These companies may be located anywhere in the world, be of any size and operate within any industry sector. The Fund may, at times, invest in a relatively small number of companies.

The Fund may invest in other transferable securities (e.g. shares and bonds), money market instruments, cash or near cash, deposits, units or shares in other funds (up to 10%) (which may be managed by the Investment Manager, one of its affiliates or a third party) and derivatives (for investment purposes and/or managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth with a low level of risk).

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives. The MSCI All Countries World Index is used for performance comparison. The Fund does not seek to replicate the index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because the Fund invests in the shares of companies, whose values tend to fluctuate widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Commodity-related investment: Commodity prices can be extremely volatile and losses may be made.

Concentrated portfolio: The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Geographic / Sector: Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that the resulting value may decrease whilst portfolios more broadly invested might grow.

Sustainable Strategies: Sustainable, impact or other sustainability-focused portfolios consider specific factors related to their strategies in assessing and selecting investments. As a result, they will exclude certain industries and companies that do not meet their criteria. This may result in their portfolios being substantially different from broader benchmarks or investment universes, which could in turn result in relative investment performance deviating significantly from the performance of the broader market.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

UK Sustainable Equity Fund

A sub-fund of Ninety One Fund Series iii managed by
Ninety One Fund Managers UK Limited

Class I Accumulation shares in sterling
ISIN: GBO0BGT37007

Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) and income over at least 5 years.

The Fund invests primarily (at least two-thirds) in the shares of UK companies (those incorporated in, domiciled in, or that have significant economic exposure to, the UK).

The Fund invests in companies which are considered by the Investment Manager to be making a positive contribution to society and/or the environment through sustainable and socially responsible practices, products and/or services.

Examples may include companies which provide products or services in environmental markets such as alternative energy, energy efficiency and water treatment as well as companies that contribute to improving the basic needs and quality of life of society, such as those providing or improving access to finance, health care and education.

The Fund is actively managed with a long-term investment horizon and focusses on shares which the Investment Manager believes offer above average opportunities for income and growth.

Investment opportunities are identified using in-depth analysis and research on individual companies.

These companies may be of any size and in any sector.

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives. Derivatives may be used for managing the Fund in a way that is designed to reduce risk or cost, generating income or growth with a low level of risk and, occasionally, investment purposes.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives. The FTSE All-Share Total Return Index is used for performance comparison. The Fund does not seek to replicate the index.

The Investment Association UK All Companies Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Royal London Sustainable Leaders Trust (Accumulation - Class C Shares)

ISIN: GB00B7V23Z99
Managed by RLUM Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve capital growth over the medium term (3-5 years) by investing at least 80% in the shares of UK companies listed on the London Stock Exchange that are deemed to make a positive contribution to society. Investments in the Fund will adhere to the Manager's ethical and sustainable investment policy.

The Fund's performance target is to outperform, after the deduction of charges, the FTSE All-Share Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus. The Fund is actively managed.

Policy At least 80% of the Fund will be invested in shares of UK companies which are listed on the London Stock Exchange. Where the manager believes it is in the best interests of the Fund, they may invest up to 20% of the Fund's assets in shares of overseas companies.

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. For further details of the Manager's ethical and sustainable investment policy please refer to the Prospectus.

Investors can view the current policy at

<https://www.royallondon.com/existing-customers/yourproducts/manage-your-isa-or-unit-trust/rlum-isa-overview/>.

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. Typically only a small portion of assets will be invested in cash.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for efficient portfolio management (EPM).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Concepts to understand

Capital Growth The rise in an investment's value over time.

5-Year Rolling Period Any period of five years, no matter which day you start on.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 6 because its unit price has shown a high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. This Fund has historically been primarily invested in shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category. The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

THREADNEEDLE UK SOCIAL BOND FUND (THE "FUND")

Class 2 Gross Income Shares (GBP) GB00BF233G82, a sub-fund of Threadneedle Opportunity Investment Funds ICVC (the "Company"), regulated by the FCA.
This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The Fund aims to provide income with the prospect of some investment growth over the long term (5 years or more), through investment in bonds that are deemed to be supporting and funding socially beneficial activities and development, primarily in the UK.

The Fund is actively managed, and seeks to maximise its investment exposure to socially beneficial activities and development, based on assessments produced under the Fund's Social Assessment Methodology (developed by The Big Issue Group and Columbia Threadneedle Investments). The Social Assessment Methodology ensures that social impact considerations are integrated into the investment decision-making process. Investment is directed towards eight social outcome areas: housing and property; community services; education, learning and skills; employment and training; financial inclusion; health and social care; transport and communications infrastructure, utilities and the environment. Eligible Investments are assessed to establish an overall view of the investment's "social intensity". Some debt securities will have more direct and tangible social benefits than others, however those selected for investment are considered to have net positive impacts.

A Social Advisory Committee regularly reviews the Social Assessment Methodology and the assessments carried out and may propose amendments or updates over time. An annual report is made available to investors which provides a summary of the Fund's social impact performance.

The Fund may invest in bonds (usually investment grade) issued by international, public, private or voluntary and/or charitable sector organisations. Cash or near cash will be retained within the Fund for efficient management, and similarly deposits and money market instruments may be held for this reason.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds", and in Appendix I.

For more information on investment terms used in this document, please see the Glossary published in the Document Centre on our website: www.columbiathreadneedle.com.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards Higher Risk, Typically higher rewards

- The Fund is rated 3 because historically it has shown a medium to low level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- The Fund aims to invest in assets that are deemed to be supporting and funding socially beneficial activities and development and utilises a Social Assessment Methodology. This will affect the Fund's exposure to certain issuers, industries, sectors, and regions, and may impact the relative performance of the Fund positively or negatively, depending on whether such investments are in or out of favour.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the prospectus.
